Experiencia profesional

Liceo los Delfines

Febrero 2023 - Abril 2023

IT Support

- Identified and fixed a critical vulnerability in the Gescolar system, where users were able to access the platform using executive and teacher tokens.
- Implemented Windows Server 2022 and Active Directory for centralized user management.
- Performed service restarts and software license installations across more than 60 classrooms.
- Implemented LAN monitoring and administration using Veyon for real-time supervision. Maintained operational continuity of the technology infrastructure, leading to an internship extension.

Veterinaria las Lomas

Febrero 2024 - Mayo 2025

Marketing, Software Developer y Automatización

- Provided customer support, managed social media publications, and handled advertising campaigns.
- Used automation tools such as GoHighLevel and Botpress to streamline and automate operational tasks.

Proyectos destacados

Botketing SaaS CRM

Automation workflow Software

- Automated WhatsApp, Instagram, and Facebook workflows through the Meta Graph API.
- Developed calendar, appointment scheduling, and private ticket management systems.

Discord Freelancer

Community Manager & API developer

- Programming experience since a very young age (13 years old, in 2019 during the pandemic), when I began developing software.
- Worked with Spreen, Aquino, Suwie, and multiple commissioned projects.
